Bell's spring garden

Help Bell decorate her garden!

what you will need:

- Scissors. Be careful! Always seek help from an adult when cutting with scissors!
- Glue stick / double-sided tape
- Markers or colored pencils

Instructions

1. Print the PDF.

2. Color the garden.

Color the grass, the hut, Bell, and all the elements you want to use to decorate the garden.

3. Carefully cut out the elements.

Cut along the solid lines around each element.

Be careful not to cut off the bases of Bell, the hut, and the fences. They will help each element stand up.

Leave the paper tabs attached to the watering can and the basket — you'll need them to attach them to Bell's arm.

4. Decorate the garden!

Fold the bases of Bell, the hut, and the fences along the dotted lines so they can stand, then place them in the garden.

Fold the tabs of the watering can and the basket along the dotted lines and hang them on Bell's arm.

Glue flowers and any decorations you like onto the grass to create your very special garden.

5. Have fun!

Print it as many times as you like to create a different garden each time, with different flowers and colors.

You can also design and draw your own decorations on extra paper.

Send me a picture of your garden or post it using #playwithdormaco. I'll share it on Dormaco's official social media.
